

Up to  
**200 turbines**  
covering 700 km<sup>2</sup>

Turbines will be about  
**268 m to  
385 m high**

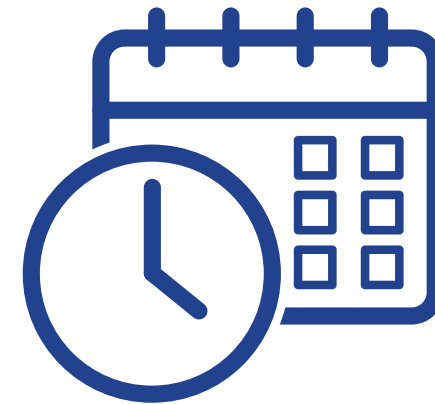

**3 GW of power a year**  
- enough to power up to  
**3 million**  
West Australian homes  
and businesses

Rotor diameter of  
about  
**240 m  
to 320 m**

Project lifespan  
of up to  
**50 years**

Located in  
**Commonwealth**  
waters

Create about  
**5,000 direct jobs**  
during all the  
construction period /  
1GW of power

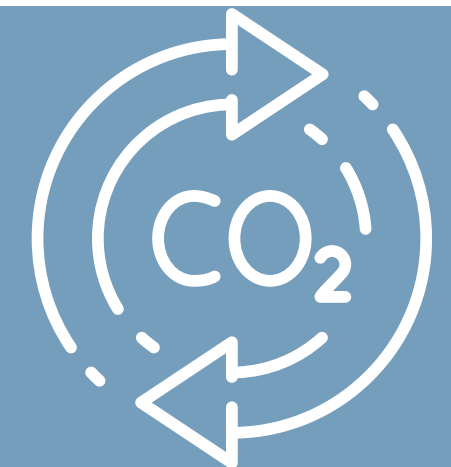

Up to  
**200 jobs**  
per year during  
operation

Turbines to be  
**20 km to 70 km**  
offshore

Pending approvals,  
construction to  
**start in 2029,**  
with first power in  
**2030**

Expected offset of more  
than  
**8 million tonnes**  
of CO<sub>2</sub> a year
