

Up to
200 turbines
covering 700 km²

Turbines will be about
**268 m to
385 m high**

3 GW of power a year
- enough to power up to
3 million
West Australian homes
and businesses

Rotor diameter of
about
**240 m
to 320 m**

Project lifespan
of up to
50 years

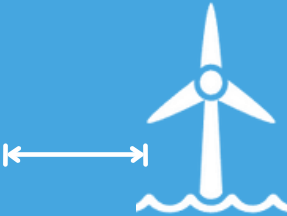

Located in
Commonwealth
waters

Create about
5,000 direct jobs
during all the construction
period / 1GW of power

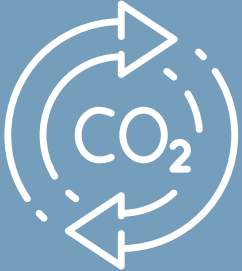

Up to
200 jobs
per year during
operation

Turbines to be from
30 km
offshore

Subject to
approvals,
construction would
start in 2029,
with first power in
2030

Expected offset of
more than
8 million tonnes
of CO₂ a year
